

UPCOMING ROAD MAINTENANCE **IN YOUR NEIGHBORHOOD**

April 28, 2016

Dear Resident or Business Operator:

Starting in late May, weather permitting, Seattle Dept. of Transportation (SDOT) will be maintaining several arterial streets in Seattle through the Crack Seal Program. SDOT crews will fill cracks in the pavement with a low-tack sealant to reduce the infiltration of surface water, thus slowing the rate of pavement deterioration. This work will be helpful in preventing the formation of potholes and other pavement distresses.

The crack-filling work will be done at these locations that include your neighborhood:

- **S Dearborn St – between 5 Av S and Rainier Av S**
- **12 Av S – between E Yesler Wy and Jose Rizal Bridge (south of S Weller St)**
- **Airport Wy S – between S Royal Brougham Wy and S Edmunds St**
- **50 Av S – between S Genesee St and S Hudson St (southbound lane only)**
- **Beacon Av S between S Holgate St (top of ramp) and 11 Av S**
- **35 Av SW – between Fauntleroy Wy SW and SW Manning St**
- **SW Manning St – between 35 Av SW and 37 Av SW**
- **Beach Dr SW – between SW Genesee St and SW Canada Dr**
- **NE 45 St – between 7 Av NE and 20 Av NE**
- **NE 45 St – between Montlake Blvd NE and 43 Av NE**
- **NE 45 Pl – between Union Bay Pl NE and 47 Av NE**
- **35 Av NE – between NE 47 St and NE 55 St**
- **NE Northgate Wy – between 1 Av NE and 15 Av NE**

PARKING: Parking will be temporarily restricted on both sides of the street as the work will address all cracks from curb to curb. “No Parking” signs will be installed approximately 72 hours prior to start of work. The parking restrictions will be in effect from 7 AM to 5 PM, and are removed as soon as the maintenance work is done. The crack seal process is typically done within a day.

LANE CLOSURES: There will be **no** full street closure during the operation. However, we will close lanes intermittently, and parking will be restricted. Lane closures may last approximately 3-4 hours. Access to driveways or alleys may be disrupted for a few minutes during the road maintenance, but SDOT crews will work to minimize any delays and will provide assistance as needed. Traffic flaggers will be present during maintenance work. Sidewalks will remain open at all times.

SCHEDULE: The project will commence in mid-May in the order of the locations shown above. Due to weather dependence and other unforeseen factors, the road work schedule is subject to change. The installation of “No Parking” signs prior to the start of work will be a good indication of our upcoming work on your street. If you need more information regarding the schedule, please contact us.
